

Serial No. 08/307,703

IN THE CLAIMS:

14. (Amended) A push-chair for transporting a first child and a second child, comprising:

a frame [supporting] to which is attached front and rear wheels and a seat for the first child;

a platform on which the second child can stand disposed at a lower rear position on the frame and including a substantially unobstructed trailing edge, the rear wheels being mounted adjacent the trailing edge of the platform; and

means for mounting the seat to the frame at a position substantially forward of the platform;

wherein [the rear wheels are mounted substantially at a trailing edge of the platform] a substantially unobstructed space is formed above the platform and behind the seat, and whereby the second child can step onto and off the platform.

15. (Amended) A push-chair according to claim 14, wherein the frame includes a pair of delta-shaped side frames, each including a front sloping bar intersecting and attached to a rear sloping bar and a horizontal [frame] bar intersecting and attached to both the front and rear sloping [frames] bars, wherein the platform is mounted on lower ends of the rear sloping bars.

Claim 18, line 2, change "lower" to --rear--.
